Career Objective

Aspiring AI Engineer with a strong foundation in Artificial Intelligence, Machine Learning, Data Structures, and Algorithms. I aim to apply my technical skills, problem-solving abilities, and passion for innovation to build intelligent solutions that create real-world impact. Eager to learn, contribute, and grow in a dynamic and collaborative environment.

Skills

Technical Skills

Programming Languages:

- Python
- Java (Learning Data Structures & Algorithms)

Web Technologies:

- HTML
- CSS

Core Concepts:

- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
- Machine Learning Concepts

Soft Skills

- Strong Problem-Solving Ability
- Analytical Thinking
- Effective Communication
- Team Collaboration
- Continuous Learning Mindset
- Adaptability

Education

Asia Pacific University of Technology & Innovation (APU) 2026
Student Mobility Exchange Program (5 months)
Kuala Lumpur, Malaysia

NIET, Dr. Abdul Kalam Technical University 2024 – Present
B.Tech - AI&ML, CGPA: 8.05
Greater Noida, Uttar Pradesh

Oxford Public Sr Sec School, CBSE 2023 – 2024
Secondary higher education - PCM, CGPA: (XII) 82.4
Nehtaur, Uttar Pradesh

Oxford Public Sr Sec School, CBSE 2021 – 2022
Secondary education - CGPA: 8.3
Nehtaur, Uttar Pradesh

Projects

AI-Assisted Vaccination Prioritization Model

- Developing an AI-based healthcare model using Python, applying regression and classification techniques to analyze demographic data.
- Focused on fair and efficient vaccination prioritization through structured data processing and predictive modeling.

Ghumo Bharat – Tourism Web Platform

- Building a tourism-focused web platform using HTML, CSS, and API integration with a structured and responsive layout.
- Emphasizing clean UI design and improved frontend user experience through optimized interface development.

Heart Disease Prediction

- Built a machine learning model in Python to predict the likelihood of heart disease from patient health parameters.
- Applied data preprocessing, classification techniques, and model evaluation to improve prediction reliability.

Smart India Hackathon (SIH)

- Participated in a national-level hackathon, contributing to structured solution design for real-world problem statements.
- Collaborated effectively within a team environment, supporting technical planning and innovative idea development.

Leadership & Extracurricular Activities

Smart India Hackathon (Internal Round Participant)

- Contributed to structured solution design and technical ideation under time-constrained conditions for real-world problem statements.
- Collaborated within a team environment, supporting task coordination, technical discussions, and strategic planning.

Workshops & Technical Engagement

- Attended technical workshops on Python, Advanced Python, Java, C Programming, and Web Technologies to strengthen programming fundamentals and practical development skills.
- Actively engaged in coding sessions and peer learning initiatives to enhance problem-solving, logical thinking, and collaborative development abilities.

Certifications & Achievements

MOOCs Completed:
Machine Learning | Probability & Statistics using Python | OOPS using Python | Data Structures & Algorithms | Programming in C | Microsoft Excel 2016 | Microsoft Office 2016

Additional Credentials:
National Science Congress – State Level Participant | Virtual Internship – CODSOFT
